

*Summer fun begins with Lift Tech Marine!
Available at your local marine dealer.*

AC POWER - 110 VOLT

DC POWER - 12 & 24 VOLT BATTERY

Models Available...

A/C MANUAL 110 VOLT. Lift Tech has left no stone unturned with this best seller. The motor comes with the latest electronics and a dock side key switch. This low amp draw motor allows for a wide range of lakeside power variations. (check with manufacturer for power requirements)

A/C REMOTE 110 VOLT. Comes with 2 long range FM fobs with locking feature. L.E.D. canopy strip light for night docking is optional. This motor also has the dock side key switch.

NEW FOR 2014

A/C REMOTE 110 VOLT WITH AUTO STOP. Same as AC remote but with the option of setting your own up & down limits to prevent over winding your boat lift.

D/C MANUAL 12/24 VOLT. Often called "The Little Engine That Could" We used a robust 100 amp relay, push in snap connectors and a solid dock side key switch. It comes with 15' of cable to boat battery.

D/C REMOTE 12/24 VOLT. 12v or 24v remote control. Comes with 2 long range FM fobs with locking feature. L.E.D. canopy strip light for night docking is optional. This motor also has the dock side key switch. It requires a BT1, BT2, or BT3 battery tray and a 12 or 24v solar panel kit.
