

24" Height Adjustment

Lift Level'r – Take the hassle out of leveling your Lift!

Level your lift and stay dry with our new screw-adjustment leg system! A cordless drill allows quick lift height adjustment with fluctuating water levels.

- **Adjust on the Fly and Stay Dry** - 24" of lift height adjustment made easy without entering the water.
- **Save \$ on Service Calls** - No more calling a service technician to raise and lower your lift with the changing water levels. Level it yourself within seconds.
- **Efficient Lift Operation** - Prevent costly repairs and keep your lift operating efficiently by keeping it level. If one corner settles, simply use a cordless drill to quickly level it.
- **Unique Gearless Drive Design** - Provides years of trouble-free operation, eliminating troublesome bevel gears. No more worrying about over torquing or gear-fouling.
- **Easily Serviceable** - The gearless drive is easily replaced, if necessary, without removing the lift from the water.
- **Retrofit Kits Available** - Take the hassle out of leveling your lift. Convert your standard boat lift legs to Lift Level'r legs.

The Lift Level'r system is available on all New ShoreStation Lifts 1500 to 6000 lb.

Retrofit Kits are available as shown below.
