

Protect your boat lift from the elements with the new safeguard construction Designed to ward off corrosion for a lifetime of hassle free operation.

For the first time, major structural components are totally aluminum. That's right no more worrying about corrosion on the platform, frame, legs, and posts. Plus, the fasteners and cables are now stainless steel or brass to assure minimum maintenance.

How do our new aluminum cradles compare to the legendary strength of the ShoreStation steel cradles? No worry! We've custom engineered new aluminum crossmembers that have been tested to be as strong as steel, yet with all the anti-corrosive benefits of aluminum.

Available on all vertical lifts 1500 lb. up to 6000 lb!

STAINLESS STEEL & BRASS FASTENERS

No need to worry about rust or corrosion. The stainless or brass nuts and bolts will endure the test of time.

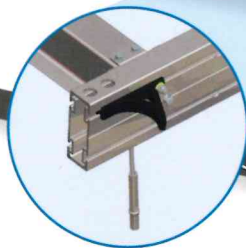

NEW ULTRABUNKS

The maintenance free, hassle-free aluminum/poly bunks won't rot or tear like the traditional carpeted wood bunks.

PULLEYS & BEARINGS

Whether they are GARMAX bearings in platform pulleys or sealed roller bearings in the winch tube pulley; all pulleys and bearings are maintenance free. No lubrication required.

GUIDE RING

These newly designed noise reducing guide rings make adjustments and replacements quick and simple.

UNIQUELY DESIGNED ALUMINUM PLATFORM CRADLE TUBE

The key to providing the strength, function and long lasting durability that is crucial for boat support.
