The **SS945** tandem axle frame riser kit is designed to fit 2x5 boat trailer frames. The spacer tubes fit between the bottom of the frame and the spring brackets. This allows the frame and its support system can be raised 2" with respect to the axle and fenders for boat designs requiring additional fender clearance.

The riser tubes are designed to fit the tandem spring brackets for 13" tires. The kit includes the correct length U-bolts for either size frame.
