

Simply brilliant

Our all-new Solar ShoreLight is a bright, simple and cost effective way to go green. The Solar ShoreLight is virtually free to operate and outshines the competition with a powerful LED light that is as bright as a 60-watt light bulb.

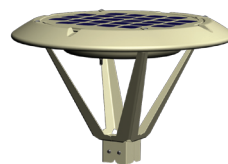

Powered by high-tech solar technology, all components are sealed in one sleek fixture for maximum protection from the elements. No more worrying about special wiring or electrical inspections, just sit back, relax and enjoy the extended hours of light.

It's perfect for commercial, public or residential areas with two versions:

Pedestal Option

Light up your back yard, patio, deck, pool, marina, or use it around your RV camper. The durable weather-resistant base provides stability while letting you move the light where you need it. Includes sand beige Solar ShoreLight, Base and Post.

Mountable Option

The easy to mount sand beige Solar ShoreLight attaches safely to any 3" or 3 1/2" square post, making it perfect for marinas, bike or walking trails, and outdoor pavilions.

Solar Savings

Using the power of the sun, the Solar ShoreLight practically pays for itself. Save some green, by going green. Let's do the math...*

Yard Light with Photoeye	\$175
Installation by Electrical Contractor	\$450
3-Years of Power to Operate Light	\$150
Total	\$775

Solar ShoreLight - Pedestal option	\$768
Solar ShoreLight - Mountable option	\$660

Key Features

Loaded with bright ideas that make your life simple and hassle-free.

Solar Panel

The powerful 20-watt charger, 5x more powerful than most, maximizes energy harvest from the sun during the day so that you can have up to 10 hours of light at night*.

Power Switch

External on/off power switch allows you to control when the light is on, allowing it to maintain a full charge for when you need it.

LED Light

The high efficiency light shines much brighter than solar lights you're used to seeing. In fact, it uses 6 bright white LED lights and a high-tech diffusing lens that emits as much light as a 60 watt bulb. These LED lights, rated for 50,000 hours, use 80 to 85 percent less power than traditional lights, extending the battery charge and allowing more hours of illumination.

Fixture

20 watt solar panel, bright white LED lights, rechargeable battery and solar charge controller, all sealed in one attractive fixture that doesn't require any special wiring. The AGM battery is sealed so it cannot spill or freeze. Plus, LED components are epoxy encapsulated for maximum corrosion resistance.

Base

The durable weather-resistant base can be filled with either water or sand, making it extremely stable.

*Length of night time illumination is estimated and subject to various factors including geographic location, seasons, weather conditions & exposure to direct sunlight. This light fixture requires several hours of direct sunlight daily to enable it to get a full charge.

MODEL #	DESCRIPTION	HEIGHT	WIDTH	BATTERY	SOLAR PANEL	SHIP WEIGHT
DA0079-15	Solar ShoreLight - Pedestal Option	89"	29" (w/base)	12V Rechargeable	20 Watt	58.5 lbs.
DA0080-15	Solar ShoreLight - Mountable Option	8.5"	29"	12V Rechargeable	20 Watt	30 lbs.
